Regulations and Curriculum for Master of Technology (M. Tech.) in Construction Technology

(Deemed to be University under Section 3 of UGC Act, 1956) (Placed under Category 'A' by MHRD, Govt. of India, Accredited with 'A+' Grade by NAAC) University Enclave, Medical Sciences Complex, Deralakatte, Mangalore – 575 018, Karnataka INDIA Tel: +91-824-2204300/01/02/03, Fax: 91-824-2204305 Website: www.nitte.edu.in E-mail: info@nitte.edu.in

VISION

To build a humane society through excellence in the education and healthcare

MISSION

To develop

Nitte (Deemed to be University) As a centre of excellence imparting quality education, Generating competent, skilled manpower to face the scientific and social challenges with a high degree of credibility, integrity, ethical standards and social concern

Off-campus Centre, Nitte (Deemed to be University) NITTE-574110, Karkala Taluk, Udupi District, Karnataka, India

Vision Statement

Pursuing Excellence, Empowering people, Partnering in Community Development

Mission Statement

To develop N.M.A.M. Institute of Technology, Nitte, as Centre of Excellence by imparting Quality Education to generate Competent, Skilled and Humane Manpower to face emerging Scientific, Technological, Managerial and Social Challenges with Credibility, Integrity, Ethics and Social Concern.

M. Tech. Regulations and Curriculum

Batch 2022 - 2024

With Scheme of Teaching & Examination

REGULATIONS: 2022 for M. Tech. Programs (Academic year 2022-23)

COMMON TO ALL M.Tech. DEGREE PROGRAMS CHOICE BASED CREDIT SYSTEM (CBCS)

Program Title	Master of Technology, abbreviated as
	M.Tech. (Construction Technology)
Short description	Two-year, four semester Choice Based Credit System (CBCS) type
	of Postgraduate Engineering Degree Program with English as
	medium of instruction
Program Code	22ENGR12D2
Revision version	2022.02
	These regulations may be modified from time to time as mandated
	by the policies of the University. Revisions are to be recommended
	by the Board of Studies for Civil Engineering and approved by the
	Academic Council.
Effective from	12-09-2022
Approvals	• Approved in the 50 th meeting of Academic Council of NITTE
	(Deemed to be University), held on 30-05-2022 and vide
	Notification of NITTE (DU), N(DU)/REG/N-MCE/2022-
	23/76B dated 19-08-2022.
	• Notification of Nitte (DU), N(DU)/REG/AC/-SA/2022-23/909
	dated 24-04-2023.
Program offered at	NMAM Institute of Technology, Nitte
	Off Campus centre, Nitte (Deemed to be University)
Grievance and	All disputes arising from this set of regulations shall be addressed to
dispute resolution	the Board of Management. The decision of the Board of
	Management is final and binding on all parties concerned. Further,
	any legal disputes arising out of this set of regulations shall be
	limited to jurisdiction of Courts of Mangalore only

SCHEME AND SYLLABUS:	

1. INTRODUCTION:

- **1.1** The general regulations are common to all Degree of Master of Technology Program under Outcome Based Education (OBE) and Choice Based Credit System (CBCS) conducted by Nitte (Deemed to be University), at the NMAM Institute of Technology, Nitte off Campus Centre and shall be called "Nitte (DU) Regulations for M.Tech.- 2022".
- **1.2** The provisions contained in this set of regulations govern the policies and procedures on the Registration of students, imparting instructions of course, conducting of the examination and evaluation, and certification of students' performance and all amendments thereto leading to the said degree program(s)
- 1.3 This set of Regulations, on approval by the Academic Council and Governing Council, shall supersede all the corresponding earlier sets of regulations of the M.Tech. Degree program (of Nitte (DU)) along with all the amendments thereto, and shall be binding on all students undergoing M.Tech. Degree Program (s) (Choice Based Credit System) conducted at the NMAMIT, Nitte with effect from its date of approval and is applicable for students admitted to 1st year after September 2022. This set of regulations may evolve and get modified or changed through appropriate approvals from the Academic Council / Governing Council from time to time, and shall be binding on all stake holders, (the Students, Faculty, Staff of Departments of NMAMIT, Nitte). The decision of the Academic Council/ Governing Council shall be final and binding.
- **1.4** In order to guarantee fairness and justice to the parties concerned in view of the periodic evolutionary refinements, any specific issues or matters of concern shall be addressed separately, by the appropriate authorities, as and when found necessary.
- **1.5** The Academic Council may consider any issues or matters of Concern relating to any or all the academic activities of the NMAMIT courses for appropriate action, irrespective of whether a reference is made here in this set of Regulations or otherwise.
- **1.6** The course shall be called **Master of Technology** program abbreviated as M.Tech. (subject of specialization) Choice Based Credit System.
- 2. **DEFINITIONS OF KEYWORDS:** The following are the definitions/descriptions that have been followed for the different terms used in the Regulations of M.Tech. Programs:
 - 2.1 **Program:** Is an educational program in a particular stream/branch of Engineering/branch of specialization leading to award of Degree. It involves events/activities, comprising of lectures/ tutorials/ laboratory work/ field work, outreach activities/ project work/ vocational training/ viva/ seminars/ Internship/ assignments/ presentations/ self-study etc., or a combination of some of these.
 - **2.2 Branch:** Means Specialization or discipline of M. Tech Degree Program, like Electrical Vehicle Technology, Structural Engineering, Machine Design, etc.
 - **2.3 Semester:** Refers to one of the two sessions of an academic year (vide: serial number 4), each session being of sixteen weeks duration (with working days greater than or equal to 90). The odd semester may be scheduled from August/September and even semester from February/March of the year.

- **2.4** Academic Year: Refers to the sessions of two consecutive semesters (odd followed by an even) including periods of vacation.
- 2.5 Course: Refers to usually referred to as 'subjects' and is a component of a program. All Courses need not carry the same credit weightage. The Courses should define learning objectives and learning outcomes. A Course may be designed to comprise lectures/ tutorials/ laboratory work/ field work/ outreach activities/ project work/ vocational training/ viva/ seminars/ term papers/ assignments/ presentations/ selfstudy etc. or a combination of some of these.
- **2.6 Credit:** Refers to a unit by which the Course work is measured. It determines the number of hours of instructions required per week. One credit is equivalent to one hour of lecture or two hours of laboratory/ practical Courses/ tutorials/ fieldwork per week etc.
- **2.7** Audit Courses: Means Knowledge/ Skill enhancing Courses without the benefit of credit for a Course.
- **2.8 Choice Based Credit System (CBCS):** Refers to customizing the Course work, through Core, Elective and soft skill Courses, to provide necessary support for the students to achieve their goals.
- **2.9 Course Registration:** Refers to formal registration for the Courses of a semester (Credits) by every student under the supervision of a Faculty Advisor (also called Mentor, Counsellor etc.,) in each Semester for the Institution to maintain proper record.
- **2.10 Course Evaluation:** Means Continuous Internal Evaluation (CIE) and Semester End Examinations (SEE) to constitute the major evaluations prescribed for each Course. CIE and SEE to carry 50 % and 50 % respectively, to enable each Course to be evaluated for 100 marks, irrespective of its Credits.
- **2.11 Continuous Internal Evaluation (CIE):** Refers to evaluation of students' achievement in the learning process. CIE shall be by the Course Instructor and includes tests, homework, problem solving, group discussion, quiz, mini-project and seminar throughout the Semester, with weightage for the different components being fixed at the University level.
- **2.12 Semester End Examinations (SEE):** Refers to examination conducted at the University level covering the entire Course Syllabus. For this purpose, Syllabi to be modularized and SEE questions to be set from each module, with a choice confined to the concerned module only. SEE is also termed as university examination.
- **2.13 Make Up Examination:** Refers to examination conducted for the candidates who has a CIE>=35 marks and may have missed to attend the SEE covering the entire course syllabus. The standard of Make Up Examination is same as that of the SEE.
- **2.14 Supplementary Examination:** Refers to the examination conducted to assist slow learners and/or failed students through make up courses for a duration of 8 weeks. This comprises of both the CIE & SEE and will be conducted after the completion of First year M.Tech. even semester.
- **2.15 Credit Based System (CBS):** Refers to quantification of Course work, after a student completes teaching learning process, followed by passing in both CIE and SEE. Under CBS, the requirement for awarding Degree is prescribed in terms of total number of credits to be earned by the students.

2.16 Credit Representation: Refers to Credit Values for different academic activities considered, as per the Table.1. Credits for seminar, project phases, project viva–voce and internship shall be as specified in the Scheme of Teaching and Examination.

Table 1: Credit Values							
Theory/Lectures (L) (hours/week/Semester)	Tutorials (T) (hours/week/ Semester)	Laboratory /Practical (P) (hours/week/ Semester)	Credits (L: T:P)	Total Credits			
4	0	0	4:0:0	4			
3	0	0	3:0:0	3			
2	2	0	2:1:0	3			
2	0	2	2:0:1	3			
2	2	2	2:1:1	4			
0	0	2	0:0:1	1			
NOTE: Activities like, practica	NOTE: Activities like, practical training, study tour and participation in Guest lectures not to carry any credits.						

- **2.17 Letter Grade:** It is an index of the performance of students in a said Course. Grades are denoted by letters O, A+, A, B+, B, C and F.
- **2.18 Grading:** Grade refers to qualitative measure of achievement of a student in each Course, based on the percentage of marks secured in (CIE+SEE). Grading is done by Absolute Grading. The rubric attached to letter grades are as follows:

Letter	0	A+	А	B+	В	С	F
Grade							
Academic	Outstanding	Excellent	Very	Good	Above	Average	Fail
Level			Good		Average		

2.19 Grade Point (GP): Refers to a numerical weightage allotted to each letter grade on a 10-point scale as under.

Letter Grade and corresponding Grade Points on a typical 10 – Point scale							
Letter Grade	0	A+	А	B+	В	С	F
Grade Point	10	09	08	07	06	05	00

- **2.20 Passing Standards:** Refers to passing a Course only when getting GP greater than or equal to 05 (as per serial number 2.20).
- **2.21** Credit Point: Is the product of grade point (GP) and number of credits for a Course i.e., Credit points $CrP = GP \times Credits$ for the Course.
- **2.22** Semester Grade Point Average (SGPA): Refers to a measure of academic performance of student/s in a semester. It is the ratio of total credit points secured by a student in various Courses of a semester and the total Course credits taken during that semester.

- **2.23** Cumulative Grade Point Average (CGPA): Is a measure of overall cumulative performance of a student over all semesters. The CGPA is the ratio of total credit points earned by a student in various Courses in all semesters and the sum of the total credits of all Courses in all the semesters. It is expressed up to two decimal places.
- **2.24 Grade Card:** Refers to a certificate showing the grades earned by a student. A grade card shall be issued to all the registered students after every semester. The grade card will display the program details (Course code, title, number of credits, grades secured) along with SGPA of that semester and CGPA earned till that semester.
- **2.25** University: Nitte (Deemed to be University), Mangalore. NMAM Institute of Technology is an off-campus centre of Nitte (DU) and located at Nitte.

22NMT2.5	If sufficient number of GATE qualified candidates are not available, the remaining vacant seats shall be filled from amongst the candidates appeared for NUCAT Entrance Examination in the order of merit.					
22NMT2.6	Engineering graduates other than the Karnataka candidates shall get their Eligibility verified from Nitte (DU) to seek admission to M.Tech. Program at NMAMIT, Nitte					
22NMT2.7	Admission to vacant seats: Seats remaining vacant (unfilled), after the completion of admission process through GATE/NUCAT Entrance Exam, the remaining seats shall be filled by Candidates based on merit in the entrance test conducted at the Institution level. An admission Committee, consisting of the Principal, Head of the concerned Department and the subject experts, shall oversee admissions.					
22NMT3.0	REGISTRATION:					
	Every student after consulting his Faculty-Advisor in parent department is required to register for the approved courses with the Departmental Post Graduate Committee (DPGC) of Parent Department at the commencement of each Semester on the days fixed for such registration and notified in the academic calendar.					
22NMT3.1	Lower and Upper Limits fo	r Course	Credits Reg	gistered in	a Semester.	
	 Course Credit Assignment: All courses comprise of specific Lecture/ Tutorial/ Practical (L-T-P) schedule. The course credits are fixed based on the following norms. Lecture/Tutorials/ Practical: (i) a 1-hour Lecture per week is assigned 1.0 Credit. (ii) a 2-hour Tutorial session per week is assigned 1.0 Credit. (iii) a 2-hour Lab. session per week is assigned 1.0 credits. For example, a theory course with L-T-P schedule of 3-2-0 hours will be assigned 4.0 credits. A laboratory practical course with L-T-P schedule of 0-0-2 hours will be assigned 1.0 credit. 					
	Typical Academic Load (I &	& II Semes	ter)

	3 Elective Courses	3-0-0	03	09	09	
	1 Audit Course	2-0-0	0	0	02	
	Total: 9 Courses			21	27	

	A student must register, as advised by Faculty Advisor, between a minimum of					
	16 credits and up to a Maximum of 28 credits. However, the minimum/					
	maximum Credit limit can be relaxed by the Dean (Academic) on the					
	recommendations of the DPGC, only under extremely exceptional					
	circumstances.					
22NMT3.2	Mandatory Pre-Registration for higher semester:					
	In order to facilitate proper planning of the academic activities of the Semester,					
	it is necessary for the students to declare their intention to register for courses					
	of higher semesters $(2^{nd} \text{ and above})$ at least two weeks before the end of the					
	current semester choosing the courses offered by each department in the next					
	higher semester which is displayed on the Departmental Notice Board at least					
	4 weeks prior to the last working day of the semester. Students who fail to					
	register on or before the specified date will have to pay a late fee. Registration					
	in absentia is allowed only in exceptional cases with the permission of the Dean					
	(Academic).					
	Registration to a higher semester is allowed only if the student fulfills the					
	following conditions-					
	i) Satisfied all the academic requirements to continue with the program of					
	studies without termination.					
	ii) Cleared all institute, hostel and library dues and fines, if any, of the					
	previous semester.					
	iii) Paid all required advance payments of the Institute and the hostel for the					
	current semester.					
	Has not been debarred from registering on any specific grounds by the Institute.					
22NMT3.3	Course Pre-Requisites:					
	In order for a student to register for some course(s), it may be required either					
	to have completed satisfactorily or to have prior earned credits in some					
	specified course(s). In such instances, the DPGC shall specify clearly, any such					
	course pre-requisites, as part of the curriculum.					
22NMT3.4	Students who do not register before the dead line day of registration may be					
	permitted LATE Registration up to the notified day in academic calendar on					
	payment of late fee.					
22NMT3.5	REGISTRATION in ABSENTIA will be allowed only in exceptional cases on					
	the recommendation of DPGC through the authorized representative of the					
	student.					
22NMT3.6	Medium of Instruction/Evaluation/etc. shall be English.					
22NMT4.0	COURSES:					
	The curriculum of the Program shall be any combination of following type of					
	courses:					
	i) Professional Core Courses (PCC) - relevant to the chosen					
	specialization/ branch [May be split into Hard (no choice) and Soft (with					
	choice), if required]. The core course is to be compulsorily studied by a					
	student and is mandatory to complete the requirements of a program in a					
	said discipline of study.					

	 ii) Professional Electives Courses (PEC) - relevant to the chosen specialization/ branch: these are the courses, which can be chosen from the pool of papers. It shall be supportive to the discipline/ providing extended scope/enabling an exposure to some other discipline / domain / nurturing student skills. iii) Research Experience Through Practice-I and Research Experience Through Practice-II iv) Project Work v) Seminar vi) Audit Courses (AC): a) The Audit course can be any credit course offered by the program to which the candidate is admitted (other than the courses considered for completing the prescribed program credits) or other programs offered in the institution, where the student is studying. b) The students are required to register for one audit course during I and II semesters. Students who have registered to the same course for credit, must satisfy attendance and CIE requirements. However, they need not have to appear for SEE. c) Registration for any audit course shall be completed at the beginning of I and II semesters. The Department should intimate the Controller of Examination about the registration at the beginning of the semester and obtain a formal approval for inclusion of the audit course/s in the Grade card issued to the students 					
	period mentioned in Scheme of Teach	ing and E	xamination.			
22NMT4.1	Program Structure:					
	The number of credits to be registered in a semester is between 16 and 28 Minimum Credit Requirement for the M.Tech. Degree is 80. The total course package for an M.Tech. Degree Program will typically consist					
	of the following components.					
	Course type Range % Suggested Credits					
	i) Program Core Courses	20 - 25	20			
	ii) Program Elective Courses	18 - 20	15			
	iii) Elective Courses (MOOCS)	4	03			
	iv) Industrial Internship/Research	10	08			
	Internship/Mini Project					
	v) Project	35	28			
	vi) Seminar	2.5	02			

vii) Research Experience Through Practice			5	04	
viii)Audit courses (two courses)			-	-	
Total credits				80	

The Department Post Graduate Committee (DPGC) will discuss and recommend the exact credits offered for the program for the above components, the semester-wise distribution among them, as well as the syllabi of all postgraduate courses offered by the department from time to time before sending the same to the Board of Studies (BOS).

The BOS will consider the proposals from the departments and make recommendations to the Academic Council for consideration and approval.

Mandatory Learning Courses:

These are courses that must be completed by the student at appropriate time as suggested by the Faculty Adviser or the DPGC. Courses that come under the category are as following:

Industrial Training:

This is a 08-credit course. A full-time student will complete the Industrial Training (or a Mini Project) at appropriate time stipulated by DPGC and register for it in the following Semester and shall also submit a bound copy of training report certified by the authority of Training Organization. The duration and the details, including the assessment scheme, shall be decided by the faculty advisor, with approval from DPGC.

Seminar:

This also carries 2-credits to be completed at appropriate time stipulated by DPGC. The student will make presentations on topics of academic interest, as suggested by DPGC.

Research Experience through Practice-I and Research Experience through Practice-II:

- Research Experience through Practice-I and II are 2-credit courses in the first and second semesters respectively.
- The student will work under a faculty supervisor approved by the DPGC and submits a research proposal at the end of the first semester which is evaluated jointly by the faculty supervisor and a co-examiner.
- Students shall be offered inputs like how to conduct a literature survey, how to identify a research problem, how to write a research paper, research report, research proposal, and systematic way of conducting research etc.
- Department specific/PG Program specific skill sets required for carrying out a research work may be offered to the students like software tools for system/device simulation and analysis, software/ hardware tools for signal acquisition, data processing, control simulation, Testing/measuring equipment used in research and Testing/measuring procedure.
- At the end of Research Experience through Practice-I in the first semester, M. Tech. students should be able to identify a research problem, with clear objectives and methodologies backed by extensive literature review.

22NMT5.0	 Two internal examiners will evaluate the Research Experience through Practice-I out of which one will be the guide and the other examiner will a faculty member who is having expertise in the research area of the student being evaluated. The research proposal report and the research proposal presentation are evaluated for 100 marks in the first semester. The student will work on the proposed research in the second semester and submit a research paper at the end of the second semester which is evaluated jointly by the faculty supervisor and a co-examiner. In the second semester, the students are expected to carry out Mathematical modelling / Design calculations / computer simulations / Preliminary experimentation / testing of the research problems identified during Research Experience through Practice-I carried out in the first semester. At the end of the second semester, students are expected to write a full research paper based on the Mathematical modelling/ Design calculations/computer simulations/computer simulations/Preliminary experimentation/testing carried out during second semester. The research paper submitted by the student and the presentation of the research work carried out is evaluated for 100 marks in the second semester.
	The student shall undergo Internship/Mini Project as per the Scheme of
	Teaching and Examination.
	1. The internship can be carried out in any industry/R&D
	Organization/Research Institute/Institute of national repute/R&D Centre
	of Parent Institute.2. The Department/college shall nominate a faculty to facilitate, guide and
	supervise students under internship.
	 The students shall report the progress of the internship/Mini Project to the
	internal guide in regular intervals and seek his/her advice.
	4. The Internship shall be completed during the period specified in Scheme of Teaching and Examination.
	 After completion of Internship/mini project, students shall submit a report
	to the Head of the Department with the approval of both internal and
	external guides and with the approval of internal guide if the
	Internship/Mini-Project is carried out in the Institute.
	6. The Internship/Mini Project will be evaluated jointly by two internal examiners appointed by the Head of the Department/Controller of
	Examination.
	 The Internship/Mini Project report and the presentation by the student will
	be evaluated for 50 marks each immediately after completion of the
	Internship/Mini Project.
	The students are permitted to carry out the internship anywhere in India or
	Abroad. The Institution will not provide any kind of Financial Assistance to
	any student for Internship/Mini Project and for the conduct of Viva-Voce on internship.
22NMT5.1	Failing to undergo Internship/Mini Project:
	- uning to under 50 miter nome/min + + ojecti

Securing a pass grade in Internship/Mini Project is mandatory as	s a partial	
requirement for the award of Degree.		
Internship/Mini Project Securing a pass grade in Internship/Mini	•	
mandatory. If any student fails to undergo/complete the Interr	nship/Mini	
Project, he/she shall be considered as fail in that Course.		
6.0 SEMINAR:		
Securing a pass grade in Seminar is mandatory as a partial requirement	ent for the	
award of Degree.		
i) Each candidate shall deliver seminar as per the Scheme of Teach	ching and	
Examination on the topics chosen from the relevant fields for	about 30	
minutes.		
The Head of the Department shall make arrangements for conducting	g seminars	
through concerned faculty members of the department. The Panel of	Examiners	
constituted for the purpose by the Head of the Department shall awa	rd the CIE	
marks for the seminar.		
7.0 PROJECT WORK:		
Securing a pass grade in Project Work is mandatory as a partial re-	quirement	
for the award of Degree.		
Project work shall be on individual basis.		
Project Part-I and Part-II:		
Project Part-I: (In third Semester)		
The duration of the Project Part-I is of 12 weeks as notified in the	academic	
calendar. The evaluation of the Project Part-I will be done during t	the end of	
third semester.		
Each department will prepare the Panel of Examiners in advance	and also	
prepare the Project Part-I evaluation schedule indicating the nam	nes of the	
students, their USN, Title of the Project, Name of the Examiners, and	d time and	
Venue of the evaluation which will be submitted to the Con	troller of	
Examination Office in advance.		
Project Part-I evaluation will be done by two internal Examiners, or	ne of them	
will be the Guide and other is preferably one of the experts in the a	rea of PG	
Project being evaluated.		
The mark distribution of Project Phase-I evaluation is: 100 marks	for report	
and 100 marks for presentation jointly awarded by the both the exam	niners.	
Project Part-II: (In the fourth Semester)		
The total duration of Project Part-II is of 22 weeks as notified in the		
calendar. There will be two Continuous Internal Evaluation of Proje	ect Part-II	
in fourth semester followed by Semester End Evaluation of the Proje	ect Phase-	
II, namely, Project Progress Evaluation-I (PPE-I), Project Progress E	Evaluation	
-II(PPE-II) and SEE.		
The same Panel of Examiners which was formed during Proj	ect Part-I	
evaluation is to be continued for the Project Progress Evaluation in	the fourth	
semester.		

	PPE-I and PPE-II will be scheduled as per the academic calendar and will be
	evaluated for 100 marks each (50 marks for report and 50 marks for
	presentation jointly conducted by the two internal examiners).
	Each department will prepare the Panel of Examiners in advance and also
	prepare the Project Part-II Project Progress Evaluation Schedule indicating the
	names of the students, their USN, Title of the Project, Name of the Examiners,
	and time and Venue of the evaluation as per the format which will be submitted
	to the Controller of Examination Office in advance.
	For the Off-Campus projects, the Internal Guide should visit the organization
	in which the M.Tech Student is carrying out his Project at least once during
	the project term.
	The candidate shall submit a soft copy of the dissertation work to the Institute.
	The soft copy of the dissertation should contain the entire Dissertation in
	monolithic form as a PDF file (not separate chapters).
	The Guide, after checking the report for completeness shall check the report
	for Plagiarism content. The allowable plagiarism index is less than or equal to
	25%. If the check indicates a plagiarism index greater than 25%, the guide
	should advice the student to resubmit the dissertation after modifying the
	report. The report has to be once again checked for the plagiarism content and
	the signed hard copy of the Plagiarism Report along with the two hard copies
	of the dissertation is to be submitted to the Head of the Institution through the
	Head of the Department. The dissertation will be evaluated by two examiners,
	one of the examiners shall be the Guide of the candidate and the other examiner
	shall be an external expert in the area of the dissertation being evaluated.
	The guide shall submit panel of two approved external examiners to the office
	of the Controller of Examination through the head of the Department. The
	Controller of Examination will randomly select one of the external examiners
	and invites him/her formally for the evaluation of the dissertation and Viva-
	Voce examination giving sufficient time for the external examiner for reading
	the dissertation.
22NMT7.1	The dissertation will be evaluated by two examiners, one of the examiners shall
	be the guide of the candidate and the other examiner shall be preferably an
	external expert in the area of the dissertation being evaluated. The evaluation
	of the dissertation shall be made independently by each examiner.
22NMT7.2	Examiners shall evaluate the dissertation normally within a period of not more
	than two weeks from the date of receipt of dissertation through email.
22NMT7.3	The examiners shall independently submit the marks for the dissertation during
	the viva-voce examination date
22NMT7.4	Sum of the marks awarded by the two examiners shall be the final evaluation
	marks for the Dissertation.
22NMT7.5	(a) Viva-voce examination of the candidate shall be conducted, if the
	dissertation work and the reports are accepted by the external examiner.
	(b) If the external examiner finds that the dissertation work is not up to the
	expected standard and the minimum passing marks cannot be awarded, the
	dissertation shall not be accepted for SEE.

	(c) If the dissertation is rejected during the Project Part II, then the Second
	Examiner (external) will be appointed by the COE against whom the
	candidate has to re-present the same dissertation. The decision of the
	Second Examiner (external) will be final.
	If the second examiner (external) accepts the dissertation, then the viva-voce
	examination of the candidate shall be conducted as per the norms. If the second
	examiner (external) rejects the dissertation, then the student has to take an
	extension for a minimum period of 3 months and re-work on the project. After
	the completion of the extension period, viva-voce examination of the candidate
	shall be conducted as per the norms, if the dissertation work is accepted by the
	external examiner.
22NMT7.6	The candidate, whose dissertation is rejected, can rework on the same topic or
	choose another topic of dissertation under the same Guide or new Guide if
	necessary. In such an event, the report shall be submitted within four years from
	the date of admission to the Program.
22NMT7.7	Viva-voce examination of the candidate shall be conducted jointly by the
	external examiner and internal examiner/ guide at a mutually convenient date.
22NMT7.8	The relative weightages for the evaluation of dissertation and the performance
	at the viva-voce shall be as per the scheme of teaching and examination.
22NMT7.9	The marks awarded by both the Examiners at the viva-voce Examination shall
	be sent jointly to the office of Controller of Examination immediately after the
	examination.
22NMT7.10	Examination fee as fixed from time to time by the Institute for evaluation of
	dissertation report and conduct of viva-voce shall be remitted to the Institute as
	per the instructions of Dean-Academics, from time to time.
22NMT7.11	The candidates who fail to submit the dissertation work within the stipulated
	time have to apply for the extension of the Project duration through the Guide
	and the head of the department to the Office of the Controller of Examination.
	Such candidate is not eligible to be considered for the award of rank.
22NMT8.0	ATTENDANCE REQUIREMENT:
	1. Each semester is considered as a unit and the candidate has to put in a
	minimum attendance of 85% in each subject with a provision of
	condoning 10% of the attendance by Principal for reasons such as medical
	grounds, participation in University level sports, cultural activities,
	seminars, workshops and paper presentation etc.
	2. The basis for the calculation of the attendance shall be the period of term
	prescribed by the institution in its calendar of events. For the first
	semester students, the same is reckoned from the date of admission to the
	course.
	3. The students shall be informed about their attendance position in the first
	week of every month by the College so that the students shall be cautioned
	to make up the shortage.
	to make up the shortage.4. The head of the department shall notify regularly, the list of such candidates who fall short of attendance. The list of the candidates falling

 short of attendance shall be sent to the Principal with a copy to Controlle of Examinations. 5. A candidate having shortage of attendance (<75%) in any course(s registered shall not be allowed to appear for SEE of such course(s). Such students will be awarded 'N' grade in these courses. 6. He/she shall have to repeat those course(s) with 'N' grade and shall re
5. A candidate having shortage of attendance (<75%) in any course(s registered shall not be allowed to appear for SEE of such course(s). Such students will be awarded 'N' grade in these courses.
registered shall not be allowed to appear for SEE of such course(s). Such students will be awarded 'N' grade in these courses.
students will be awarded 'N' grade in these courses.
6. He/she shall have to repeat those course(s) with 'N' grade and shall re
register for the same course(s) core or elective, as the case may be when
the particular course is offered next either in a main (odd/even) or summe
semester.
7. If a candidate, for any reason, discontinues the course in the middle he/she
may be permitted to register to continue the course along with subsequen
batch, subject to the condition that he/she shall complete the class work
lab work and seminar including the submission of dissertation within
maximum stipulated period. Such candidate is not eligible to be
considered for the award of rank.
22NMT9.0 ADD/ DROP/ AUDIT OPTIONS:
1. ADD-option: A student has the option to ADD courses for registration
till the date specified for late registration.
2. DROP-option: A student has the option to DROP courses from
registration until one week after the mid-semester examination.
AUDIT-option: A student can register for auditing a course, or a course ca
even be converted from credit to audit or from audit to credit, with the conser
of faculty advisor and course instructor until one week after the mid-semester
exam. However, CORE courses shall not be made available for audit. It is not
mandatory for the student to go through the regular process of evaluation in a
audit course. However, the student has to keep the minimum attendance
requirement, as stipulated by the corresponding DPGC for getting the 'U' grad
awarded in a course, failing which that course will not be listed in the Grad
Card.
22NMT10.0 ABSENCE DURING THE SEMESTER:
Leave of Absence
(a) If the period of leave is more than two days and less than three weeks, prio
application for leave shall have to be submitted to the Head of the
Department concerned, with the recommendation of the Faculty-Adviso
stating fully the reasons for the leave request along with supporting
documents.
It will be the responsibility of the student to intimate the course instructors
Head of the Department and also Chief Warden of the hostel, regarding hi
absence before availing leave.
22NMT10.1 Absence during Mid-Semester Examinations:
A student who has been absent from a Mid-Semester Examination (MSE) du
to illness and other contingencies may give a request for additional MSE withi
two working days of such absence to the office of the respective Head of th
Department (HOD) with necessary supporting documents and certificatio
from authorized personnel. The HOD may consider such requests dependin

	on the merits of the case, may permit the additional Mid-Semester Examination
	for the concerned student.
22NMT10.2	Absence during Semester End Examination:
	In case of absence for a Semester End Examination, on medical grounds or
	other special circumstances the student can apply for 'I' grade in that course
	with necessary supporting documents and certifications by authorized
	personnel to the Controller of Examination through Chairman of The
	-
	Department. The Controller of Examination may consider the request
	depending on the merits of the case and permit the make-up Semester End
	Examination for the concerned student. The student may subsequently
	complete all course requirements within the date stipulated by DPGC (which
	may be extended till first week of next semester under special circumstances)
	and 'I' grade will then be converted to an appropriate letter grade. If such an
	application for the 'I' grade is not made by the student, then a letter grade will
	be awarded based on his in-semester performance.
22NMT11.0	WITHDRAWAL FROM THE PROGRAM:
	Temporary Withdrawal: A student who has been admitted to a Post Graduate
	Degree program of the College may be permitted to withdraw temporarily, for
	a period of one semester or more on the grounds of prolonged illness or grave
	calamity in the family etc. The student should abide by the applicable rules and
	regulations of the college/University at the time of Temporary Withdrawal.
22NMT11.1	Permanent Withdrawal:
	Any student who withdraws admission before the closing date of admission
	for the Academic Session is eligible for the refund of the deposits only. Fees
	once paid will not be refunded on any account. Once the admission for the year is closed, the following conditions govern
	withdrawal of admissions:
	a) A student who wants to leave the College for good, will be permitted to do
	so (and can take Transfer Certificate from the College, if needed), only after
	remitting the Tuition fees as applicable for all the remaining semesters and
	clearing all other dues, if any.
	b) Those students who have received any scholarship, stipend or other forms
	of assistance from the College shall repay all such amounts in addition to those
	mentioned in (a) above.
	The decision of the Principal of the Institute regarding withdrawal of a student
	is final and binding.
22NMT12.0	EVALUATION SYSTEM:
	Continuous Internal Evaluation (CIE) and Semester End Evaluation (SEE)
22NMT12.1	For all the theory and laboratory courses, the CIE marks shall be 50.
	For Research Experience through Practice-I, Research Experience through
	Practice-II, Seminar, Industrial Training/Mini Project, the CIE marks shall be
	100.

22NMT12.12 If the difference15 per centthird Example	on. erence between the marks awarded by the two examiners is not more er cent of the maximum marks, the marks awarded to the candidate

	the candidate. In case, if one of the three marks falls exactly midway between			
	the other two, then the highest two marks shall be taken for averaging.			
22NMT12.13	Summer Semester: Summer semester is primarily to assist weak and/or			
	students having N/F grade in courses, for a duration of 4 weeks after the			
	completion of regular even SEE. The institute may also offer Add-on/ Audit			
	Courses during this semester.			
22NMT12.14	Each candidate shall obtain not less than 50% of the maximum marks (25			
	marks) prescribed for the CIE of each subject, including seminars. CIE Marks			
	shall be based on assignments, tests, oral examinations and seminar (minimum			
	of two are compulsory) conducted in respective subjects. The candidates			
	obtaining less than 50% of the CIE marks in any subject shall not be eligible			
	to appear for the SEE in that subject(s). Only in such cases, the Controller of			
	Examination may arrange for reregistering the subject(s) in subsequent			
	semester or may refer to DPGC for necessary remedial measures. The			
	candidates shall write the Internal Assessment Test in Blue Books, and this			
	shall be maintained by the Head of the Department for at least six months after			
	the announcement of result and is available for verification. The CIE marks			
	sheet shall bear the signature of the concerned Teacher and the Chairman of			
	the Department. The CIE marks list shall be displayed on the Notice Board and			
	corrections, if any, shall be incorporated before sending to the Controller of			
	Examinations.			
22NMT12.15	The Academic Performance Evaluation of a student shall be according to a			
	Letter Grading System, based on the Class Performance Distribution.			
	The Letter grades O, A+, A, B+, B, C and F indicate the level of academic			
	achievement, assessed on a decimal (0-10) scale. The Letter grade awarded to			
	a student in a course, for which he has registered shall be based on his			
	performance in quizzes, tutorials, assignments etc., as applicable, in addition			
	to two mid-semester examination and one semester end examination. The			
	distribution of weightage among these components may be as follows:			
	Semester End Examination (SEE) 50%			
	Continuous Internal Evaluation (CIE)			
	(i) Quizzes, Tutorials, Assignments etc., 20%			
	(ii) Mid-semester Examination: 30%			
	Any variation, other than the above distribution, requires the approval of the			
	pertinent DPGC and Academic Council.			
	The letter grade awarded to a student in a 0-0-P (Practical) course, is based on			
	an appropriate continuous evaluation scheme that the course instructor shall			
	evolve, with the approval of the pertinent DPGC.			
	The course Instructor shall announce in the class, and/or display in the display			
	boards or at the website, the details of the Evaluation Scheme, including the			
	distribution of the weightage for each of the components, and method of			
	conversion from the raw scores to the letter-grades; within the first week of the			
	semester in which the course is offered, so that there are no ambiguities in			
	communicating the same to all the students concerned.			

22NMT12.16	The Transitional Grades 'I', 'W' and 'X' would be awarded in the following				
	cases. These would be converted into one or the other of the letter grades (O-				
	F) after the student completes the course requirements.				
	Grade "I": To a student having attendance \geq 85% and CIE \geq 70%, in a course,				
	but remained absent from SEE for valid & convincing reasons acceptable to				
	the College, like:				
	i. Illness or accident, which disabled him/her from attending SEE.				
	ii. A calamity in the family at the time of SEE, which required the student to be away from the College.				
	iii. However, the committee chaired by the Principal is authorized to relax				
	the requirement of CIE \geq 70% if the student is hospitalized or advised				
	long term rest after discharge from the hospital by the Doctor.				
	iv. Students who remain absent for Semester End Examinations due to valid				
	reasons and those who are absent due to health reasons are required to				
	submit the necessary documents along with their request to the				
	Controller of Examinations to write Make up Examinations within 2				
	working days of that examination for which he or she is absent, failing				
	which they will not be given permission.				
	• Grade "W": To a student having satisfactory attendance at classes but				
	withdrawing from that course before the prescribed date in a semester as				
	per Faculty Advice.				
	• Grade "X": To a student having attendance $\geq 85\%$ and CIE $\geq 70\%$, in a				
	course but SEE performance could result in a 'F' grade in the course. (No				
	"F" grade awarded in this case, but student's performance record will be				
	maintained separately).				
22NMT12.17	The Make Up Examination facility would be available to students who may				
	have missed to attend the SEE of one or more courses in a semester for valid				
	reasons and given the 'I' grade. Also, students having the 'X' grade shall also				
	be eligible to take advantage of this facility. The makeup examination would				
	be held as per dates notified in the Academic Calendar. However, it should be				
	made possible to hold a make-up examination at any other time in the semester				
	with the permission of the Academic Council of the College. In all these cases,				
	the standard of SEE would be the same as the normal SEE.				
22NMT12.18	All the 'W' grades awarded to the students would be eligible for conversion to				
	the appropriate letter grades only after the concerned students re-register for				
	these courses in a main/summer semester and fulfil the passing standards for				
	their CIE and (CIE+SEE).				
22NMT12.19	The suggested passing standards are CIE to have $\geq 50\%$ and CIE+SEE to have				
	a grade better or at least equal to C. For maintaining high standards, the students				
	scoring less than 50% in CIE are advised to withdraw and to reregister for the				
	course when offered next. The letter grade 'W' to be entered in the grade card				
	against the subject and not to be taken into account while calculating SGPA &				
	CGPA				
22NMT12.20	Rules for grace marks				

	Grace marks up to 1% of the maximum total marks of the courses for which					
	he/she is eligible and have registered (non-credit courses excluded) in the					
	examination or 10 marks whichever is less shall be awarded to the failed					
	course(s), (with a restriction of a maximum of 5 marks per course) provided on					
				e passes in that course(s)		
22NMT13.0	LETTER GR	0				
221 111 1 13.0	_		_	n wherein the marks are converted		
				declared with semester grade point		
	average (SGPA	A) and Cumula	tive Grade Po	bint Average (CGPA). The CGPA		
	will be calculat	ed for every se	mester, excep	ot for the first semester.		
			-	and the assigned range of marks		
	under absolute	grading system	are as given	below:		
	Lattan Crada	Cuada Dainta	Dam Caaraa	T and of A and amin A shianamant		
	Letter Grade	Graue- Points	Kaw Scores	Level of Academic Achievement		
				Out standing		
	0	10	≥90	Out standing		
	A+	09	80-89	Excellent		
	A 08 70-79 Very Good					
	B+	07	60-69	Good		
	В	06	55-59	Above average		
	С	05	50-54	Average		
	F 00 <50 Fail					
	U			Audited		
	A student obtaining Grade F in a Course shall be considered fail and is required					
	to reappear in subsequent SEE. Whatever the letter grade secured by the					
	student during his /her reappearance shall be retained. However, the number					
	of attempts taken to clear a Course shall be indicated in the grade cards/					
	transcripts. Earned Credits:					
	This refers to the credits assigned to the course in which a student has obtained					
	any one of the letter grades O , A + A , B +, B and C					
22NMT14.0	PROMOTION AND ELIGIBILITY:					
22NMT14.1	Promotion:					
		-		semester or year of their program,		
	irrespective of the academic performance.					
	However, for submission for M.Tech. Major Project report in 4 th semester,					
22NIN/1714-2	student should have completed all the courses up to 3 rd semester					
22NMT14.2	The mandatory non-credit courses, if any, shall not be considered for the					
	award of class, calculation of SGPA and CGPA. However, a pass grade (PP) in the above courses is mandatory for the award of Degree.					
	In the above courses is manualory for the award of Degree.					

22NMT15.0	ELIGIBILITY FOR PASSING AND AWARD OF DEGREE:			
22NMT15.1	1. A student who obtains any grade O to C shall be considered as passed and			
	if a student secures F grade in any of the head of passing, he/she has to			
	reappear in that head for SEE			
	2. A student shall be declared successful at the end of the program for the			
	award of Degree only on obtaining CGPA 25.00, with none of the courses			
	remaining with F grade.			
	In case, the CGPA falls below 5.00, the student shall be permitted to appear			
	again for SEE for required number of courses (other than seminar and practical)			
	and times, subject to the provision of University, to make up CGPA \geq 5.0. The			
	student should reject the SEE results of previous attempt and obtain written			
	permission form the Controller of Examinations to reappear to the subsequent			
	SEE.			
22NMT15.2	For a pass in a theory course, the student shall secure a minimum of 40% of the			
	maximum marks prescribed in the Semester End Examination and 50% of			
	marks in CIE and 50% in the aggregate of CIE and SEE marks. The minimum			
	passing grade in a course is C.			
22NMT15.3	For a pass in Internship/ Practical/ Project/ Dissertation/ Viva-voce			
	examination, a student shall secure a minimum of 50% of the maximum marks			
	prescribed for the SEE in Internship/ Practical/ Project/ Dissertation/ Viva-			
	voce. The minimum passing grade in a course is C.			
22NMT15.4	For a pass, a candidate shall obtain a minimum of 50% of maximum marks in			
	Seminar.			
22NMT15.5	IV Semester full time candidates having backlog courses are permitted to			
	upload the dissertation report and to appear for SEE. The IV semester grade			
	card shall be released only when the candidate completes all the backlog			
	courses and become eligible for the award of Degree.			
22NMT15.6	Eligibility for Award of Degree:			
	A student shall be declared to have completed the Degree of Master of			
	Technology, provided the student has undergone the stipulated course work as			
	per the regulations and has earned the prescribed credits, as per the scheme of			
22NMT16.0	teaching and examination of the program EVALUATION OF PERFORMANCE:			
221 111 1 10.0	Computation of SGPA and CGPA			
	SGPA and CGPA: The credit index can be used further for calculating the			
	Semester Grade Point Average (SGPA) and the Cumulative Grade Point			
	Average (CGPA), both being important academic performance indices of the			
	student. While SGPA is equal to the credit index for a semester divided by the			
	total number of credits registered by the student in that semester, CGPA gives			
	the sum total of credit indices of all the previous semesters divided by the total			
	number of credits registered in all these semesters. Both the equations together			
	facilitate the declaration of academic performance of a student, at the end of a			
	semester and at the end of successive semesters respectively.			
	SGPA is computed as follows:			

	SGPA
	$\sum [(Course Credits) \times (Grade Point)]$
	$= \frac{\text{(for all courses with letter grades including F grades in that semester)}}{\sum F c = \frac{1}{2}$
	$\sum [Course Credits]$
	(for all courses with letter grades including F grades in that semester)
	CGPA is computed as follows:
	$\sum [(Course \ Credits) \times (Grade \ Point)]$
	$CGPA = \frac{\text{(for all courses excluding those with F grades until that semester)}}{\sum CGPA}$
	CGPA = (COLUME COUNTRY = 0.0000000000000000000000000000000000
	(for all courses excluding those with F grades until that semester)
	(for an object of the grade and the source)
22NMT16.1	Communication of Grades:
	• The SGPA and CGPA respectively, facilitate the declaration of academic
	performance of a student at the end of a semester and at the end of successive
	semesters. Both of them would be normally calculated to the second decimal
	position, so that the CGPA, in particular, can be made use of in rank ordering
	the students' performance in the Institute.
	If two students get the same CGPA, the tie could be resolved by considering
	the number of times a student has obtained higher SGPA, But, if it is still not
	resolved, the number of times a student has obtained higher grades like O, A,
	B etc. could be taken into account.
22NMT16.2	Challenge evaluation
221 (101 1 10.2	If a student is not satisfied with the marks allotted to him/her in the semester
	end examinations, he/she could apply for challenge evaluation within the
	prescribed time specified. In such cases the answer papers will be valued by
	the DPGC committee and marks secured by the students in the challenge
	evaluation will be final.
22NMT16.3	Grade Card: Based on the secured letter grades, grade points, SGPA and
	CGPA, a grade card for each semester shall be issued. On specific request on
	paying prescribed fee, a transcript indicating the performance in all semesters
	may be issued.
22NMT16.4	Conversions of Grades into Percentage and Class Equivalence
	Conversion formula for the conversion of CGPA into percentage is given
	below:
	Percentage of marks secured, $P = CGPA$ Earned $\times 10$
	Illustration: for CGPA of 8.18:
	$P = CGPA Earned 8.18 \times 10 = 81.8 \%$
22NMT17.0	DEGREE REQUIREMENTS:
	The Degree requirements of a student for the M.Tech Degree program are as
	follows:
	1. College Requirements:
	i) Minimum Earned Credit Requirement for M.Tech. Degree is 80
	ii) Satisfactory completion of all Mandatory Learning courses

	2. Program Require	ments:	
	i) Minimum H	Earned Credit Requirement	s on all core courses,
	ii) Elective Co	ourses and major project as	specified by the DPGC.
	The maximum durati	on for a student for comply	ving to the Degree requirement
	is 8 semesters from t	he date of first registration	for his first semester.
22NMT18.0	TERMINATION F	ROM THE PROGRAM/	READMISSION:
	A student shall be 1	required to leave the Coll	ege without the award of the
	Degree, under the fo	llowing circumstances:	
	ii) Failing to comp	lete the degree requiremen	ts in double the duration of the
	program		
	Based on disciplinar	y action suggested by the	Academic Council/Governin
	Council.		
22NMT19.0	GRADUATION RE	EQUIREMENTS AND C	ONVOCATION:

[
	 An attempt means the appearance/registration of a candidate for an examination in one or more courses either in part or failing a particular examination. A candidate who fails/remaining absent (after submitting exam application) in the main examination and passes one or more subjects/courses or all subjects/courses in the supplementary/Make-up examination such candidates shall be considered as taken more than an attempt. Merit Certificates and University Medals/ will be awarded on the basis of overall CGPA, governed by the specific selection criteria that may be formulated by the University for such Medals / Awards Only those candidates who have completed the Program and fulfilled all the requirements in the minimum number of years prescribed (i.e., 2 years) and who have passed each semester in the first attempt are eligible for the award of Merit Certificates and /or Ranks and University Medals.
	Candidates with W, N, I, X & F grades and who passes the courses in the
	subsequent/supplementary/make up examinations are not eligible for the
	award of Gold Medal or Merit Certificate.
22NMT21.0	CONDUCT AND DISCIPLINE:
	1. Students shall conduct themselves within and outside the premises of the
	Institute, in a manner befitting the students of an Institution of National
	Importance
	2. As per the order of Honorable Supreme Court of India, ragging in any
	form is considered as a criminal offence and is banned, any form of
	ragging will be severely dealt with.
	3. The following acts of omission/ or commission shall constitute gross
	Violation of the code of conduct and are liable to invoke disciplinary
	measures:
	a) Ragging
	b) Lack of courtesy and decorum; indecent behavior anywhere within or
	outside the campus.
	c) Willful damage or stealthy removal of any property /belongings of
	the Institute /Hostel or of fellow students/ citizens
	d) Possession, consumption or distribution of alcoholic drinks or any
	kind of hallucinogenic drugs.
	e) Mutilation or unauthorized possession of Library books.
	f) Noisy and unseemly behavior, disturbing studies of fellow Students.
	g) Hacking in computer systems (such as entering into other Person's
	area without prior permission, manipulation and/or Damage of
	computer hardware and software or any other Cybercrime etc.,).
	h) Plagiarism of any nature.
	i) Any other act of gross indiscipline as decided by the University from
	time to time.
	j) Smoking in College Campus and supari chewing.
	k) Unauthorized fund raising and promoting sales
	A, Chaudionzou fana faising and promoting salos

N

A Commence with the analytic of ofference the marithment man has
4. Commensurate with the gravity of offense, the punishment may be:
reprimand, expulsion from the hostel, debarment from an examination,
disallowing the use of certain facilities of the College, rustication for a
specified period or even outright expulsion from the College, or even
handing over the case to appropriate law enforcement authorities or the
judiciary, as required by the circumstances.
i) For an offence committed in
a) A hostel
b) A department or in a classroom
c) Elsewhere,
the Chief Warden, the Head of the Department and the Dean
(Students Welfare), respectively, shall have the authority to
reprimand or impose fine.
ii) All cases involving punishment shall be reported to the Principal.
5. Cases of adoption of unfair means and/or any malpractice in an
examination shall be reported to the Controller of Examination.
• Note: Students are required to be inside the examination hall 20 minutes
before the commencement of examination. This is applicable for all
examinations (Semester end/Supplementary/makeup) henceforth. Students
will not be allowed inside the examination hall after the commencement,
under any circumstances.

Scheme & Syllabus for

M. Tech. (Construction Technology)

CIVIL ENGINEERING 2022-24

Institution Vision

Pursuing Excellence, Empowering people, Partnering in Community Development.

Institution Mission

To develop NMAM Institute of Technology, Nitte, as Center of Excellence by imparting Quality Education to generate Competent, Skilled and Humane Manpower to face emerging Scientific, Technological, Managerial and Social Challenges with Credibility, Integrity, Ethics and Social Concern.

Department Vision

To uphold the Department as a leader in community development through innovation and excellence in diverse areas of Civil Engineering to meet the global challenges and market demands.

Department Mission

- 1. To provide the students a strong theoretical knowledge and practical skills to understand the basic concept and fundamentals of various Civil Engineering subjects.
- 2. To be competent and skilled enough to take the challenges in Research, Consultancy and Entrepreneurship.
- 3. To encourage the students in developing professional ethics through discipline and principles.

Programme Educational Objectives (PEO)

PEO 1 .	Equipped to pursue professional career in the constantly
	changing field of construction, Engineering, Technology and
	Management.
PEO 2.	Competent enough to contribute knowledge base through
	Learning and Research.
PEO 3.	Continue to practice and promote the needs and challenges of
	real world problems and come up with sustainable solutions for
	social needs.

Programme Outcomes (PO)

At the end of M.Tech in Construction Technology Programme Students will have

PO1.	An ability to independently carry out research /investigation
	and development work to solve practical problems
PO2.	An ability to write and present a substantial technical report/document
PO3.	Students should be able to demonstrate a degree of mastery
	over the area as per the specialization of the program. The
	mastery should be at a level higher than the requirements in
	the appropriate bachelor program
PO4.	Demonstrate knowledge and understanding of engineering
	and management principles and apply the same to one's
	own work, as a member and leader in a team, manage
	projects efficiently in respective disciplines and
	multidisciplinary environments after consideration of
	economical and financial factors
PO5.	Acquire professional and intellectual integrity, professional
	code of conduct, ethics of research and scholarship,
	consideration of the impact of research outcomes on
	professional practices and an understanding of
	responsibility to contribute to the community for sustainable
DOC	development of society.
PO6.	Communicate with the engineering community, and with society at large, regarding complex engineering activities
	confidently and effectively, such as, being able to
	comprehend and write effective reports and design
	documentation by adhering to appropriate standards, make
	effective presentations, and give and receive clear
	instructions.

Programme Specific Outcomes (PSO)

PSO 1.	Apply knowledge of various domains of Construction Technology; conduct experiments, analyze, interpret data,
	Technology; conduct experiments, analyze, interpret data,
	and design.
PSO 2.	Competent with skills and knowledge for Research and Innovative practices
	Innovative practices

CONSTRUCTION ECONOMICS AND FINANCE

Course Code:	22CCT102	Course Type	PCC
Teaching Hours/Week (L: T: P: S)	4:0:0:0	Credits	04
Total Teaching Hours	50	CIE + SEE Marks	50+50

Teaching Department: Civil Engineering

Cour	se Objectives:							
1.	Understand the concepts of engineering economics and elementary economic analysis							
2.	Study the capital budgeting and interpret the time value of money							
3.	Study the replacement and maintenance analysis of existing asset							
4.	Study the account process, preparation of journal, ledger and balance sheet							
5.	Study the sources of funds and preparation of Final Accounting-International Financial							
	Reports Standards (IFRS).							

UNIT-I

10 Hours

Economics – Flow in an economy, Law of supply and demand. Concepts of Engineering Economics – Types of efficiency, Definition and scope of engineering economics, Elements of cost, other costs/Revenues – Marginal cost, Marginal Revenue, sunk cost, Opportunity cost, Break even Analysis – concept of decision making, Profit/volume ratio.

Elementary Economic Analysis – Material selection for a product/substitution of raw material, Design selection for a product, Building material selection, Process planning/ Process modification.

UNIT-II

Capital Budgeting – Phases of Capital Budgeting, Objectives of Capital Budgeting, Planning of Capital Expenditures, Control for Capital Expenditure, Time value of money, Present worth method, Future worth method, Annual equivalent method, Rate of return method. Evaluation of public alternatives

UNIT-III

Replacement and Maintenance Analysis – Types of maintenance, Types of replacement problem, Determination of economic life of an asset, Replacement of existing asset with a new asset – capital recovery with return, concept of challenger and defender.

UNIT-IV

Account process: Equation, Rules, Preparation of Journal and Ledger

Balance sheet – classification of assets and liabilities, accounting equation, classification of accounts, Rules of Debit and Credit, Meaning and format of journal – Meaning of journalizing, Compound Journal Entry, Opening entry, Goods account. Ledger – Relationship between journal and ledger, posting, rules of posting, balancing of an account

Trial Balance – Objectives, limitations, methods of preparation, accounting errors.

UNIT-V

10 Hours

Trading Account, Profit and loss account, understanding cash flows and fund flows, sources of funds, working capital management, Business plan, Venture capital – kinds, sources and operation. Preparation of Final Accounting-International Financial Reports Standards (IFRS).

10 Hours

Teaching Department: Any

Course Objectives: The research purposes are

- 1. To foresee future problems through pursuit of truth as a "global centre of excellence for intellectual creativity".
- 2. To respond to current social demands, and to contribute to the creation and development of scientific technologies with the aim of realizing an affluent society and natural environment for humanity.
- 3. At the same time, the course aims to create excellent educational resources and an excellent educational environment through frontline researches
- 4. To Understand professional writing and communication contexts and genres, analyzing quantifiable data discovered by researching, and constructing finished professional workplace documents.

Individual PG Students are to be allotted to the individual faculty members based on student's area of research interest, specialization of faculty members in the beginning of the first semester.

MODULE -1

Defining the research problem – Selecting the problem – Necessity of defining the problem - Techniques involved in defining the problem – Importance of literature review in defining a problem – Survey of literature – Primary and secondary sources – Reviews, treatise, monographs patents – web as a source – searching the web – Identifying gap areas from literature review – Development of working hypothesis, systematic way of conducting research, write a review / research paper, research proposal, preparation of research report.

MODULE-2

- Introduction various simulation tools related to Construction Technology
- Use of software tools (Primavera, BIM Tools, MATLAB-Simulink)
- Introduction to typesetting tool (Latex).

• At the end of the course students should submit a research proposal and should present the idea. The Research proposal report prepared based on the work carried out by the PG Student is evaluated for 50 marks and 20 minutes presentation on the research work carried out will be evaluated for 50 marks jointly by the examiners.

Course Outcomes: At the end of the course student will be able to

- **1.** Identify and define the problem statement based on the literature reviewed.
- **2.** Formulate the objectives specific to the defined problem statement.

3. Develop the methodology for achieving the objectives.

SPECIAL CONCRETES

Course Code:	22CCT111	Course Type	PEC
Teaching Hours/Week (L: T: P: S)	3:0:0:0	Credits	03
Total Teaching Hours	40	CIE + SEE Marks	50+50

Teaching Department: Civil Engineering

Cour	Course Objectives:					
1.	Learn the principles of concrete mix design with admixtures.					
2.	To understand the importance of light weight concrete and designing the mix proportion.					
3.	To gain the knowledge of Ferrocement materials, testing and serviceability aspects in civil					
	constructions.					
4.	To acquaintance the Fiber reinforced concrete and its material characterization with					
	detailed testing methods and application.					
5.	To have knowledge about High Performance concrete, Self-compacting concrete and other					
	special varieties of concrete					

UNIT-I

15 Hours

15 Hours

10 Hours

Development in cements and cement replacement materials, pozzolona, fly ash, silica fume, rice husk ash, recycled aggregates, industrial waste aggregates, chemical admixtures. Mix proportioning of Standard grade concrete: Principles and methods.

Light Weight concrete: Introduction, classification, properties, strength and durability, mix proportioning and problems.

High density concrete: Radiation shielding ability of concrete, materials for high density concrete, mix proportioning, properties in fresh and hardened state, placement methods.

UNIT-II

Self-Compacting Concrete: Introduction, properties, Qualifying Criteria, Testing Methods, Mix proportioning. Engineered Cementations Composites: Fibre materials, properties in fresh state, mechanical properties, crack arrest and toughening mechanism, applications, mix proportioning,

UNIT-III

High Strength concrete: constituents, mix proportioning, properties in fresh and hardened states, applications and limitations. Ready Mixed Concrete, Reactive powder concrete, Bacterial concrete

Course Outcomes: At the end of the course student will be able to

	Se Outcomes. At the end of the course student will be able to
1.	Identify the Properties, factors influencing for the use of recycled, industrial waste aggregates in concrete and explain the properties, applications and design standard grade concrete.
2.	Design Light weight and high density concrete mixes and explain their materials, properties, applications, factors affecting the mix design, Manufacturing Methods
3.	Explain Ferrocement properties, manufacturing methods, behavior in tension, compression and design a simple ferrocement slab
4.	Explain factors affecting the mix design, behavior of FRC in compression, flexure, crack arrest, toughening mechanism and design fibre reinforced concrete mix proportioning.
5.	Design Mix Proportioning of High strength concrete and explain the detailed concept of SCC, RPC and bacterial concrete.

DISASTER MANAGEMENT

Course Code:	22CCT112	Course Type	PEC
Teaching Hours/Week (L: T: P: S)	3:0:0:0	Credits	03
Total Teaching Hours	40	CIE + SEE Marks	50+50

Teaching Department: Civil Engineering

Cours	e Objectives:
1.	Describe the basic types of hazards and their potential consequences to India
2.	Understand the planning and assessment of Hazard, Risk, Vulnerability and disaster
3.	Describe the basic concepts of the emergency management cycle (mitigation,
	preparedness, response, and recovery)
4.	Critically understand the various disaster management acts and policies and approaches in
	both national and state level scenario.
5.	To build skills to respond to disasters in an effective, humane and sustainable manner

UNIT-I

15 Hours

Hazard, Risk, Vulnerability, Disaster and Disaster Management. Types of Disasters: Hazard and vulnerability profile of India.

Relevance of Disaster Risk, Vulnerability & Capacity Assessment in Planning, Concepts of Hazard Assessment, Vulnerability Assessment, Risk Assessment and Capacity Assessment, Hazard Identification and analysis.

UNIT-II

15 Hours

Four elements of comprehensive disaster management (Preparedness, Response, Recovery and Mitigation), Concept of Mitigation and its importance (Structural and Non Structural mitigation measures, identification of mitigation measures relating to different types of hazards and implementing strategies). Land use Management tools for disaster risk reduction. (building codes, GDCR, zoning ordinances, land acquisition, transfer of development rights, Recovery and reconstruction plan).

National Disaster Management Act, Various State Disaster Management Acts (Gujarat, Uttar Pradesh, Uttaranchal, Bihar, Karnataka) and State disaster management policies (e.g. Orissa, Gujarat, Uttaranchal, Karnataka, Tamil Nadu, Delhi, Uttar Pradesh). Relevance of Rehabilitation and Resettlement Policy in Recovery and reconstruction phase of disaster management. Coastal zoning regulation for construction and reconstruction phase in the coastal areas.

UNIT-III

10 Hours

Role of Government/Civil Society/International Organizations/Communities and Approaches to Community Based Disaster Risk Management and Planning. (Local coping mechanisms, Importance of Mock Drills and On site volunteer management in Community level disaster preparedness activities).

Projects implemented general description of projects carried out in India following natural disasters. Disaster resistant buildings & measures. Recent developments. Case studies

Course Outcomes: At the end of the course student will be able to Develop an understanding of the key concepts, definitions a key perspectives of All Hazards, Disasters, Risk and Vulnerability

2	2.	Develop a deep understanding of disaster resilience, risk mitigation, and recovery policies
		as they arise from natural hazards around the globe
	3.	Develop a basic under understanding of Prevention, Mitigation, Preparedness, Response
		and Recovery
4	4.	Understand the various acts and policies related to Indian disaster management
ļ	5.	Explain the role of public and private partnerships

Cours	se Objectives:
1.	To introduce the basic concepts, functions and processes of human resource management
2.	To create an awareness of the role, functions and functioning of human resource
	department of the organizations
3.	To familiarize the students with the basic concepts, tools and techniques of qualitative
	measurement of human resources requirements.
4.	To enable the students to acquire the knowledge necessary for preparing the manpower
	plan of a business enterprise and subsequent plans of actions.
5.	To train them in application of human resource planning techniques.
	UNIT-I

15 Hours

Human Resource Management: Concept and Challenges, Scope, Objectives' HR Planning Job Analysis and Design. Recruitment, Selection, Placement, Training Performance appraisal, Employee remuneration and Benefits. Industrial relations: Trade unions, Disputes and their resolution. HR Profession, and HR Department Line Management Responsibility in HRM HR Philosophy, Policies, Procedures and Practices Designing HR systems Functional Areas of HRM Human Resource Development: Values and Tools HR as a Factor of Competitive Advantage Accountability in HR

UNIT-II

15 Hours

Productivity Management Quantitative determination of Human Resource requirements: Work Study. The Human Factor in the Application of Work Study. Working Conditions and the Working Environment. Methods Study; the Approach to Methods Study.

Work Measurement; the Purpose and the Basic Procedure. The Techniques of Work Measurement; Work Sampling, Structured Estimating, Time Study and Pre-determined Time Standards. Strategic Planning and Human Resource Planning. Human Resource Planning in Changing Context

UNIT-III

10 Hours

Qualitative determination of human resource requirements: Job Analysis. Human Resource Demand Forecasting. Human Resource Supply Estimates. Action Plans – Separation. Action Plans – Retention, Training, Redeployment & Staffing

Cours	Course Outcomes: At the end of the course student will be able to				
1.	Describe the basic concepts, functions and process in human resource management.				
2.	Explain the functioning of human resource.				
3.	Describe the qualitative measurement of human resources.				
4.	Prepare the manpower plan of a business enterprise and plan of action.				
5.	To execute the application of human resource planning technique.

OPERATION RESEARCH

Course Code:	22CCT121	Course Type	PEC
Teaching Hours/Week (L: T: P: S)	3:0:0:0	Credits	03
Total Teaching Hours	40	CIE + SEE Marks	50+50

Teaching Department: Civil Engineering

Cours	ourse Objectives:			
1.	The use of operation research in civil engineering.			
2.	The linear programming methods in solving engineering problems.			
3.	The non-linear programming methods in solving engineering problems.			
4.	The dynamic programming methods in solving engineering problems.			
5.	The network analysis and post optimality analysis.			

UNIT-I

15 Hours

Use of Operations Research in Civil Engineering and Managerial Decision making process. Introduction to Optimization Techniques and their application in Engineering Planning, Design and Construction. Various models; Objective function and constraints, convex and concave functions, regions and sets.

Linear programming: Formulation of Linear optimization models, Civil engineering applications. Simplex method, special cases in simplex method, Method of Big M, Two phase method, duality, sensitivity analysis. Transportation Model and its variants, Assignment Model and its variants. Games Theory.

UNIT-II

15 Hours

Non-Linear programming: Single variable unconstrained optimization –Local & Global optima, Unimodal Function- Sequential Search Techniques: Dichotomous, Fibonacci, Golden Section methods. Multivariable optimization without constraints-The gradient vector and Hessian Matrix, Gradient techniques, steepest ascent/decent technique, Newton's Method. Multivariable optimization with equality Constraints-Lagrange Multiplier Technique.

Dynamic Programming: Introduction – Recursive equation approach, solution of Discrete DPP, Solution of LPP by Dynamic Programming Waiting line models: Poisson - Exponential single server model – infinite and finite population, Poisson - Exponential multiple server model – infinite population.

	UNIT-III	
		10 Hours
Netw	ork Analysis: Introduction- Minimum Span Problems, Shortest- Route problems, M	aximal- Flow
Probl	ems. Post optimality analysis: Monte - Carlo system simulation	
Cours	se Outcomes: At the end of the course student will be able to	
1.	Describe the importance of operation research in civil engineering.	
2.	Integrate the linear programming methods in solving engineering problems.	
3.	Involve the non-linear programming methods in solving engineering problems.	
4.	Integrate the dynamic programming methods in solving engineering problems.	
5.	Design a network and analyze the post optimality.

REMEDIAL ENGINEERING

Course Code:	22CCT122	Course Type	PEC
Teaching Hours/Week (L:T:P: S)	3:0:0:0	Credits	03
Total Teaching Hours	40	CIE + SEE Marks	50+50

Teaching Department: Civil Engineering

Cour	se Objectives:
1.	Know about causes of deteriorations of concrete and various NDT methods for investigations.
2.	Have vast information about the design and construction errors, corrosion mechanism and corrosion protection.
3.	Know about different types of concrete for repairing of damaged building.
4.	Know about crack pattern, different techniques of crack repairing of damaged structures.
5.	Demonstrate various methods of retrofitting of RC members and demolition technique.

UNIT-I

15 Hours

15 Hours

10 Hours

Introduction, Cause of deterioration of concrete structures, Diagnostic methods & Analysis, preliminary investigations, experimental investigations using NDT

Influence on Serviceability and Durability: Effects due to climate, temperature, chemicals, wear and erosion, Design and construction errors, corrosion mechanism, Effects of cover thickness and cracking, methods of corrosion protection, corrosion inhibitors, corrosion resistant steels, coatings, cathodic protection

UNIT-II

Materials for Repair: Special concretes and mortar, concrete chemicals, special elements for accelerated strength gain, Expansive cement, polymer concrete, sulphur infiltrated concrete, Ferro cement, Fiber reinforced concrete.

Techniques for Repair: Rust eliminators and polymers coating for rebar during repair, foamed concrete, mortar and dry pack, vacuum concrete, Gunite and Shot Crete, Epoxy injection, Mortar repair for cracks, shoring and underpinning

UNIT-III

Examples of Repair: To Structures Repairs to overcome low member strength, Deflection, Cracking, Chemical disruption, weathering wear, fire, leakage, marine exposure, engineered demolition techniques for dilapidated structures - case studies

1.	se Outcomes: At the end of the course student will be able to Identify the defects in concrete by using various NDT methods and propose proper remedial
	measures.
2.	Identify the design and construction errors and suggest appropriate solution to repair.
3.	Idea of using appropriate materials for repair and restoration of damaged structure.
4.	Identification of crack pattern and suggest various techniques of crack repairing for damaged
	structures.
5.	Suggest suitable methods of retrofitting of damaged RC members and safe demolition
	technique for severely damaged buildings.

Teaching Hours/Week (L:T:P: S)	3:0:0:0	Credits	03
Total Teaching Hours	40	CIE + SEE Marks	50+50

Teaching Department: Civil Engineering

Cour	se Objectives:
1.	Know the factors to be considered in designing a good highway and airfield pavement, and
	their requirements.
2.	Understand the analysis of various types of stresses in flexible pavements and to design the
	thickness of various layers as per IRC:37-2001.Also, to know the guidelines in design of the
	flexible pavement as per some famous standard International methods.
3.	Impart the knowledge on analyzing various types of stresses in rigid pavements and to design
	the pavement slab thickness as per IRC:58-2002.
4.	Get the knowledge in designing the various elements of rigid pavements as per IRC:58-2002.
5.	Understand the working principle of various equipments used for highway construction and
	also to describe the different steps involved in preparing sub-grade, embankment, and tests
	used to check its quality.
6	To describe the different steps involved in preparing sub-grade, embankment, and tests used
	to check its quality.
7	Study the specifications, construction methods and quality control checks used for rigid
	pavement construction, and various components of rigid pavements.

UNIT-I

Introduction

Highway and airport pavements, objects of pavement design, Desirable characteristics and requirements of a well-designed Pavement. Types and component parts of pavements, their differences - Factors affecting design and performance of flexible and rigid pavements. Significance and determination of CBR value and modulus of sub-grade reaction value in pavement design.

Analysis and design of flexible pavements

Stresses and deflections in homogeneous single layer and two-layer masses. ESWL concept for dual and tandem wheel load assembly, Effect of wheel-load repetitions-EWLF and its applications.

General approach, Vehicle damage factor- significance and its determination from axle-load distribution data. CBR method of pavement design-Principle – Design steps and Problems on IRC: 37-2001,

UNIT-II

Analysis and design of rigid pavements

Basic principle and concepts. Effect of wheel load and its repetitions, Westergaard's analysis of stresses, Modified Westergaard's (IRC) equations- Concept of Wheel load stresses-Warping stresses-Frictional stresses-Combined stresses.

Introduction, Types of joints and their functions, joint spacing; Design of joint details for longitudinal joints, contraction joints, expansion joints and load transfer joints. IRC method of design by stress ratio method (**IRC: 58-2002**).

Subgrade and cement concrete pavements	06 Hours
Earthwork grading and construction of embankments and cuts for roads. Preparation	of subgrade,
quality control tests.	

Introduction, Specifications of materials and method of cement concrete pavement construction as per IRC (MORT&H) guidelines ; Quality control tests; Construction of various types of joints in CC pavement.

06 Hours

10 Hours

10 Hours

UNIT-III

Flexible pavements:

05 Hours

Introduction, Interface treatment-Prime coat and tack coat; Specifications of materials, construction method and field control checks for the following flexible pavement layers – GSB, WBM, WMM, BM, DBM, SDBC and BC as per IRC (MORT&H) guidelines.

Structural evaluation using BBD Method: General approach, Field data collection, statistical analysis, Corrections and overlay design using BBD studies using IRC-81 guidelines.

Course Outcomes: At the end of the course student will be able to

- **1. Describe** the requirements and the factors to be considered in designing a good highway and airfield pavements.
- 2. Analyze the stresses in various layers of flexible pavements and **design** the pavement as per IRC:37-2001.
- **3. Analyze** the various types of stresses in rigid pavements and **design** the pavement thickness and components as per IRC:58-2002.
- **4. Select** the suitable equipment for the construction of pavement based on necessity and their working principle, and **narrate** the different steps involved in preparing sub-grade embankment, and tests used to check its quality. Also **to explain** construction and quality control measures of jointed cement concrete pavement
- 5. **Explain** the specifications, construction methods, and quality control checks during the construction of flexible pavement. Also, **execute** an overlay design of flexible pavement from BBD studies as per IRC guidelines.

Course Objectives

MECHANIZATION IN CONSTRUCTION

Course Code:	22CCT131	Course Type	PEC
Teaching Hours/Week (L: T: P: S)	3:0:0:0	Credits	03
Total Teaching Hours	40	CIE + SEE Marks	50+50

Teaching Department: Civil Engineering

Cours	e Objectives.
1.	To understand the importance of mechanization in construction projects, study the
	different classification of the equipments in construction projects, calculating costs related
	to the equipments in construction.

- To understand how to reduce to costs related to the equipments in the construction 2. projects, estimating the productivity of the equipments.
- To understand the different types of aggregate production, types of bar bending 3. techniques, workability and its assessment of concrete in fresh state and during its production, and costs related to the concrete productions.
- 4. To know the different types of constriction of bridges, understand different types of tunneling methods. To know and understand the types of form work, design of form work for the construction 5.
 - projects, difference between prefab/prefab construction, and safety related to the construction.

UNIT-I

15 Hours

of

Introduction to mechanization: Definition, advantages and limitations of mechanization, Indian scenario and Global scenario.

Mechanization through construction equipment: standard and special, equipments cost: ownership and operating, Depreciation: definition and methods of assessing depreciation.

Mechanization through construction equipments: Production Cycle: Dozers, scrapers, Excavators, Finishing equipment, Trucks and Hauling equipment, Hoisting equipment, Draglines and Clamshells.

UNIT-II

15 Hours Mechanization in Aggregate manufacturing: Natural aggregates and recycled aggregates Mechanization in - Rebar fabrication, Concrete production and placement Mechanization through construction methods/technologies: segmental construction bridges/flyovers, box pushing technology for tunneling, trench-less technology

	UNIT-III					
		10 Hours				
Formwork and scaffolding- types, materials and design principles.						
Precast/Prefab construction. Safety and Environmental issues in different equipment usages.						
Cour	rse Outcomes: At the end of the course student will be able to					
1.	Explain the importance of mechanization in construction projects, classify the equ	uipment's				
	in construction projects and calculate equipment costs.					
2.	Describe costs related to the equipments and estimate the productivity of the equipments and estimate the productivity of the equipments and estimate the productivity of the equipment of the eq	uipments.				
3.	Illustrate different types of aggregate production, bar bending techniques, and in	nprovise				
	costs related to the concrete productions.					
4.	Explain the different types in constriction of bridges, tunneling methods.

STRUCTURAL MASON	RY
------------------	----

Course Code:	22CCT132	Course Type	PEC
Teaching Hours/Week (L: T: P: S)	3:0:0:0	Credits	03
Total Teaching Hours	40	CIE + SEE Marks	50+50

Teaching Department: Civil Engineering

Cours	Course Objectives:		
1.	To learn performance of masonry structures		
2.	To learn masonry structural design.		
3.	To evaluate the strength and stability of the masonry structures		
4.	To learn the load bearing masonry design		
5.	To study the design procedure for earthquake resistant masonry		
UNIT-I			

15 Hours

Introduction, Masonry units, materials and types: History of masonry Characteristics of Brick, stone, clay block, concrete block, stabilized mud block masonry units – strength, modulus of elasticity and water absorption. Masonry materials – Classification and properties of mortars, selection of mortars.

Strength of Masonry in Compression: Behaviour of Masonry under compression, strength and elastic properties, influence of masonry unit and mortar characteristics, effect of masonry unit height on compressive strength, influence of masonry bonding patterns on strength, prediction of strength of masonry in Indian context, Failure theories of masonry under compression. Effects of slenderness and eccentricity, effect of rate of absorption, effect of curing, effect of ageing, workmanship on compressive strength.

UNIT-II

15 Hours

Flexural and shear bond, flexural strength and shear strength: Bond between masonry unit and mortar, tests for determining flexural and shear bond strengths, factors affecting bond strength, effect of bond strength on compressive strength, orthotropic strength properties of masonry in flexure, shear strength of masonry, test procedures for evaluating flexural and shear strength.

Design of load bearing masonry buildings: Permissible compressive stress, stress reduction and shape reduction factors, increase in permissible stresses for eccentric vertical and lateral loads, permissible tensile and shear stresses, Effective height of walls and columns, opening in walls, effective length, effective thickness, slenderness ratio, eccentricity, load dispersion, arching action, lintels; Wall carrying axial load, eccentric load with different eccentricity ratios, wall with openings, freestanding wall; Design of load bearing masonry for buildings up to 3 to 8 storeys using BIS codal provisions.

UNIT-III

10 Hours

Earthquake resistant masonry buildings: Behaviour of masonry during earthquakes, concepts and design procedure for earthquake resistant masonry, BIS codal provisions. Masonry arches, domes and vaults: Components and classification of masonry arches, domes and vaults, historical buildings, construction procedure.

(Course Outcomes: At the end of the course student will be able to				
	1.	Achieve Knowledge of design and development of problem solving skills.			
	2.	Understand the principles of design and construction of masonry structures			
	3.	Design and develop analytical skills.			

N

	Deemed to be Universit												
4.	Summarize the masonry Characteristics.												
5.	Evaluate the strength and stability of the masonry structures.

ADVANCED REINFORCED CONCRETE DESIGN

Course Code:	22CCT133	Course Type	PEC
Teaching Hours/Week (L: T: P: S)	3:0:0:0	Credits	03
Total Teaching Hours	40	CIE + SEE Marks	50+50

Teaching Department: Civil Engineering

Cours	Course Objectives:			
1.	Understand the underlying concepts for the design of elements subjected to shear and			
	Torsion			
2.	Use the concept of redistribution of moments in design			
3.	Develop equations for the design of compression members of arbitrary sections subjected			
	to general loading			
4.	Compute effective length of columns based on structural framing, instead of simplified			
	values.			
5.	Select proper method for Design of Flat slab systems			
	UNIT-I			

15 Hours

Behaviour of RC Beams in Shear and Torsion: Modes of Cracking, Shear Transfer Mechanisms, Shear Failure Modes, Critical Sections for Shear Design, Influence of Axial Force on Design Shear Strength, Shear Resistance of Web Reinforcement, Compression Field Theory, Strut-and-Tie Model. Equilibrium Torsion and Compatibility Torsion, Design Strength in Torsion, Design Torsional Strength with Torsional Reinforcement- Space Truss Analogy and Skew Bending Theory

Redistribution of Moments in RC Beams: Conditions for Moment Redistribution – Final shape of redistributed bending moment diagram – Moment redistribution for a two-span continuous beam – Advantages and disadvantages of Moment redistribution – Modification of clear distance between bars in beams (for limiting crack width) with redistribution – Moment – curvature Relations of Reinforced Concrete sections. Curtailment of tension Reinforcement - code procedure – Numerical Example.

UNIT-II

15 Hours

Design of Reinforced Concrete Deep Beams: Introduction – Minimum thickness -Steps of Designing Deep beams – design by IS 456 - Detailing of Deep beams.

Behaviour and Analysis of Compression Members: Effective Length Ratios of Columns in Frames, Code Charts – Numerical Examples, Short Columns - Modes of Failure in Eccentric Compression, Axial Load - Moment Interaction equation, Interaction Surface for a Bi-axially Loaded Column, Concept of Equilibrium approach and application to Non rectangular columns. Slender Column: Braced and Unbraced, Design Methods as per IS 456 – Strength Reduction and Additional Moment Method

UNIT-III

10 Hours

Flat Slab Design: Behaviour of Slab supported on Stiff, Flexible and no beams, Equivalent Frame Concept, Proportioning of Slab Thickness, Drop Panel and Column Head, Transfer of Shear from Slab to column, Direct Design Method, Equivalent Frame Method – Design Examples. FE analysis and design of Slab Panels based on Wood-Armer equations.

Course Outcomes: At the end of the course student will be able to

1. Design R C beams subjected to critical shear and torsional moment.

2.	Analyzing continuous R C beams using moment redistribution concepts.
3.	Design of reinforced concrete R C deep beams.
4.	Design of compression members.
5.	Design of flat slabs

SEMESTER II

CONSTRUTION QUALITY AND SAFETY MANAGEMENT

Course Code:	22CCT201	Course Type	PCC
Teaching Hours/Week (L: T: P: S)	4:0:0:0	Credits	04
Total Teaching Hours	50	CIE + SEE Marks	50+50

Teaching Department: Civil Engineering

Course Objectives:

- To provide an insight into the basic concepts and importance of TQM in construction industry.
 The need for quality planning in present scenario
 To study the Quality Assurance and Quality Improvement techniques
 To study the safety systems and common hazards.
- **5.** To study planning for safety in construction project.

UNIT-I

10 Hours

QUALITY MANAGEMENT

Introduction – Definitions and objectives – Factors influencing construction quality –Responsibilities and authority – Quality plan – Quality Management Guidelines – Quality circles.

QUALITY SYSTEMS: Introduction - Quality system standards – ISO 9000 family of standards – Requirements – Preparing Quality System Documents – Quality related training – Implementing a Quality system – Third party Certification. Quality function deployment; Quality Audit.

UNIT-II

10 Hours QUALITY PLANNING: Quality Policy, Objectives and methods in Construction industry - Consumers satisfaction, Ergonomics - Time of Completion - Statistical tolerance – Taguchi's concept of quality – Codes and Standards – Documents – Contract and construction programming – Inspection procedures -Processes and products – Total QA / QC programme and cost implication.

UNIT-III

QUALITY ASSURANCE AND QUALITY IMPROVEMENT TECHNIQUES : Objectives – Regularity agent, owner, design, contract and construction oriented objectives, methods – Techniques and needs of QA/QC – Different aspects of quality – Appraisals, Factors influencing construction quality – Critical, major failure aspects and failure mode analysis, –Stability methods and tools, optimum design – Reliability testing, Reliability coefficient and reliability prediction - Life cycle costing – Value engineering and value analysis. Quality Improvement Tools and Techniques.

UNIT-IV

10 Hours

10 Hours

SAFETY SYSTEMS: Fundamental of safety management, construction safety, safety in scaffolding and working platform, welding and handling, excavation work, concreting and cementing work. Building construction, TAC and NBC rules, High rise building. Safety Management in Construction Industry-Safety rules in construction. Safety policy - Safety Organization, Safety laws and standards, Legal requirements.

SAFETY REMEDIES FOR COMMON HAZARDS: Dust, Vibration, Lead poisoning, Noise, Movement, Material, Lighting. Safety in Use of Construction equipments. Equipment Reliability considerations.

UNIT-V

PLANNING FOR SAFETY IN CONSTRUCTION PROJECTS:

10 Hours

Safety survey, safety inspection, safety sampling, Safety Audit. Safety Hazards and cost effectiveness Site management with regard to safety recommendations; Training for safety awareness and implementation; Incentives, Zero accident concepts, Planning for safety, Occupational health and ergonomics, Reportable and non-reportable accidents, Reporting occurrence of accidents and hazards, Action to be taken by site engineer in case of accidents, First aid/ Ambulance room/ dispensary, unsafe act and condition principles of accident prevention, Overall accident investigation process.

Course Outcomes: At the end of the course student will be able to

- **1.** Describe the importance of Quality Management.
- **2.** Discuss the various tools and techniques used for quality planning.
- **3.** Explain the Quality Assurance and Quality Improvement Techniques.
- 4. Discuss safety systems and common hazards and suggest preventive measures.
- **5.** Explain the importance of planning for safety and laws of safety in construction projects and report the accidents in construction.

CONSTRUCTION AND CONTRACT MANAGEMENT

Course Code:	22CCT202	Course Type	PCC
Teaching Hours/Week (L: T: P: S)	4:0:0:0	Credits	04
Total Teaching Hours	50	CIE + SEE Marks	50+50

Teaching Department: Civil Engineering

Cours	se Objectives:
1.	To understand ethics, preliminary cost estimation and concept of building cost index in
	construction project.
2.	To know concept of detailed estimation, different cost involved in construction project.
3.	To understand bidding strategies to develop bidding model and know law of contract.
4.	To understand different types of contract and FIDIC contract forms.
5.	To understand concept involved in contract administration and management and also to
	resolve disputes in contract.
	UNIT-I

10 Hours

Ethics: Definition of ethics, Ethical principles, Ethics in construction, Unethical practices in construction, Professional and Engineering Ethics. Concept of Cost and Cost engineering: Lifecycle cost, Different stages for Evolution of Project. Types of Estimates: Design Estimate, Bid Estimate and Control Estimate. Preliminary Cost Estimation or Rough estimation: various methods like Area method, Volume Method, Cost indices method, Power sizing method, typical problems on Preliminary/Rough estimates.

Concept of Building Cost Index number and how it is used in Rough or Preliminary Estimation

UNIT-II

10 Hours

Detailed Estimation: Quantity Takeoff, BOQ, Costing Philosophy: Direct cost, Indirect Cost and Other Cost parameters. Direct Cost: Components of direct cost, Labor, Materials, Plant and Machinery, Estimation of labor cost, Labor Production rate or Productivity, Estimation of Material Unit Basic Cost Indirect Cost: Office establishment and running cost, Taxes, Risks, Escalation, other costs including Profit. Plant and Machinery: Estimation of Plant and Machinery Unit basic cost, P&M Productivity based on Time Cycle & Production rate analysis.

Understanding how indirect costs are computed: Building Project, Road Project or any Infrastructure Projects, Developing Top Sheet & getting Unit Total cost by Balanced Bid.

UNIT-III

10 Hours

Bidding Models: Concept of unbalanced bid using Front end loading, back end loading and quantity error exploitation methods. Merits and demerits of each method with applicability. Problems based on GATES model. Bidding strategies: Detailed concept about bidding strategies followed in a contracting company, Principles of Competitive Bidding & Factors impacting bidding competition, Bidding Prequalification and its Process, Prequalification requirement, Bid Capacity. Types of Tender and tendering process: Open competitive Bidding, Serial Tendering, Selective tendering and Negotiated tendering. Process adopted in a contracting company for preparation and submission of tender. Item rate tender, EPC Tender, BOT Tender. Law of Contract: Indian Contract Act 1872 - Contract, Offer, Acceptance, Promise, Agreement, Essentials of valid contract + Valid, Void, Voidable and Unenforceable contracts, Contingent contracts.

Performance of Contract, Delay or non-performance of contract, Breach of contract, Damages-Liquidated and Un-liquidated, Termination of Agreements.

UNIT-IV

10 Hours

10 Hours

Types of Contract: All in contract or Entire contract, Lump sum contract or Fixed Price Contract, Item rate or Unit price contract, Percentage rate contract, Cost Plus Contract, Cost plus percentage rate contract, Cost plus fixed fee contract, cost plus fluctuating fee contract, Target contract, The Schedule Contracts, Terms Contracts. Problems on: Percentage rate contract, Cost plus contract, Cost plus percentage rate contract, Cost plus fixed fee contract, Target contract, Cost plus contract, Cost plus contract, Cost plus contract, Cost plus fixed fee contract, Cost plus contract, Cost plus contract, Cost plus fixed fee contract, Cost plus fixed fee contract, Cost plus fluctuating fee contract, Target contract, Cost plus fixed fee contract, Cost plus fixed fee contract, Cost plus fluctuating fee contract, Cost plus fixed fee contract, Cost plus fluctuating fee contract, Cost plus fixed fee contract, Cost plus fluctuating fee contract, Cost plus fixed fee contract, Cost plus fluctuating fee contract, Cost plus fixed fee contract, Cost plus fluctuating fee contract, Cost plus fixed fee contract, Cost plus fluctuating fee contract, Cost plus contract, Cost plus fixed fee contract, Cost plus fluctuating fee contract, Cost plus fixed fee contract, Cost plus fluctuating fee contract, Cost plus fixed fee contract, Cost plus fluctuating fee contract, Cost plus fixed fee contract, Cost plus fluctuating fee contract, Cost plus fluctuating fee contract, Cost plus fixed fee contract, Cost plus fluctuating fee

Understanding about FIDIC & its contract forms used for different types, Brief Discussion about FIDIC Sliver Book: EPC Contracting: Various Contract Clauses Provision in Silver Book

UNIT-V

Contract Management & Contract administration: Detailed discussion about Process of Contract management and administration

Extra work and Change order, Claims and Claim management

Disputes and Dispute resolution mechanism including Arbitration and reconciliation based on Arbitration and Conciliation Act 1996

Course Outcomes: At the end of the course student will be able to

1.	To inculcate ethics, and apply concept of preliminary cost estimation and building cost
	index in construction project.

- **2.** To estimate and identify costs involved in construction project.
- **3.** To apply laws of contract and bidding strategies to develop bidding model.
- **4.** To identify and apply types of contract and FIDIC contract forms.
- **5.** To utilize concepts involved in contract administration, management, and techniques to resolve disputes in contract.

RESEARCH EX	PERIENCE THRO	DUGH PRACTICE	-2
Course Code:	22CCT203	Course Type	RETP
Teaching Hours/Week (L: T: P)	0:0:4	Credits	2
Total Teaching Hours	0+0+52	CIE	100
Teachi	ng Department: Civi	l Engineering	
Course Objectives: The research pe	urposes are		
1. To foresee future problems th	rough pursuit of tru	uth as a "global cent	re of excellence for
intellectual creativity".			
2. To respond to current social de			-
scientific technologies with the a	aim of realizing an af	fluent society and nat	ural environment for
humanity.			
3. At the same time, the course a			ces and an excellent
educational environment throug			
4. To Understand professional w	•		
quantifiable data discovered by	researching, and co	nstructing finished pro	ofessional workplace
documents.			
The students are expected to car	ny out Mathematical	Modelling/Design	alculations (computer
simulations/Preliminary experimenta	•	5 5	•
Experience through Practice-I carried	•	•	med during Research
At the end of the second semester,			arch naner hased on
the Mathematical modelling/Design	•		
testing carried out during second se	-		
The research paper prepared based		out by the PG Studen	it is evaluated for 50
marks and 20 minutes presentation		5	
jointly by the examiners.			
Course Outcomes: At the end of the	e course student will	be able to	
1. Create a model/prototype th			Experimentation for
the proposed problem.			r
2. Analyse and validate the resu	lts obtained.		
3. Compose a technical paper a		at.

RISK MANAGEMEN I					
Course Code:	22CCT211	Course Type	PEC		
Teaching Hours/Week (L: T: P: S)	3:0:0:0	Credits	03		
Total Teaching Hours	40	CIE + SEE Marks	50+50		

Teaching Department: Civil Engineering

Cour	se Objectives:
1.	The role of project risk management in managing project.
2.	To illustrate project risk management process.
3.	To perform qualitative risk analysis.
4.	To perform quantitative risk analysis
5.	To plan risk responses in projects.
_	UNIT-I

Project Risk Management Definition, Role of Project Risk Management in Project Management, Good Risk Management Practice, Critical Success factors for Project Risk Management, Individual risks and overall project risk, stakeholder risk attitudes, iterative process, communication, responsibility for project risk management, project manager's role for project risk management

Project risk management processes, purpose and objectives of the plan risk management process, Tools and techniques for the plan risk management process, documenting the results of the plan risk management process

UNIT-II

15 Hours

15 Hours

Perform Qualitative Risk Analysis - Purpose and objectives of the perform qualitative risk analysis process, critical success factors for the perform qualitative risk analysis process – use agreed upon approach, use Agreed upon definitions of risk terms, collect high quality information about risks, perform iterative qualitative risk analysis, Tools and techniques for the perform qualitative risk analysis process – select risk characteristics that define risk importance, collect and analyse data, prioritize risks by probability and impact on specific objectives, prioritize risks by probability and impact on overall project, categorize risk causes .Document the results of the perform qualitative risk analysis process

Perform Quantitative Risk Analysis – purpose and objectives of the perform quantitative risk analysis process, critical success factors for the perform quantitative risk analysis process – prior risk identification and qualitative risk analysis, appropriate project model, commitment to collecting high quality risk data, unbiased data, overall project risk derived from individual risks, interrelationships between risks in quantitative risk analysis. Tools and techniques for the perform quantitative risk analysis process – comprehensive risk representation, risk impact calculation, quantitative method appropriate to analyzing uncertainty, data gathering tools, effective presentation of quantitative analysis results, iterative quantitative risk analysis, information for responsing planning. Documenting the results of the perform quantitative risk analysis process

UNIT-III

10 Hours

PLAN RISK RESPONSES - Purpose and Objectives of the Plan Risk Responses Process, Critical Success Factors for the Plan Risk Responses Process, Risk Response Strategies, Tools and Techniques for the Plan Risk Responses Process, monitor and control risks

Course Outcomes: At the end of the course student will be able to

1.	Manage project risk as project manager.				
2.	Outline the process of risk management to manage various stages of project.				
3.	Organize qualitative analysis and document the risk in a project.				
4.	Organize quantitative analysis and document the risk in a project.				
5.	Prepare and make use of the risk response plan at site.

INFRASTRUCTURE DEVELOPMENT–PROGRAMMES, PLANNING AND APPRAISAL								
Course Code:22CCT212Course TypePEC								
Teaching Hours/Week (L: T: P: S)	3:0:0:0	Credits	03					
Total Teaching Hours	40	CIE + SEE Marks	50+50					

Teaching Department: Civil Engineering

Cours	se Objectives:			
1.	Study the policies of central and state governments in India.			
2.	Study various programmes and initiatives for infrastructure in India.			
3.	• Study the development and alternatives for planning infrastructure in India.			
4.	Study the project appraisal and impact assessment			
5.	Study the concepts of sustainable infrastructure and risk assessments.			

UNIT-I

15 Hours

15 Hours

10 Hours

Overview on infrastructure development policies of central and state governments in India. Programmes and initiatives for development of roads, railways, airports, and urban infrastructure in India. Planning of infrastructure projects-contexts, perspectives, and objectives.

UNIT-II

Project-wise studies and development of alternatives. and - Introduction, screening, merits and demerits. Master planning. Overview of various planning tools.

Project appraisal by financial analysis, economic analysis. Social Costs – Benefits Analysis. Environmental and societal impact assessments.

UNIT-III

Concept of sustainable infrastructure development. Considerations to uncertainty and risk assessments.

Cours	e Outcomes: At the end of the course student will be able to
1.	Highlight the policies of central and state governments in India.
2.	Discuss the various programmes and initiatives for infrastructure in India.
3.	Discuss the development and alternatives for planning infrastructure in India.
4.	Prepare project appraisal and impact assessment report.
5.	Prepare the risk assessment report and implement the concepts of sustainable
	infrastructure.

VALUATION TECHNIQUES IN ENGINEERING

Course Code:	22CCT213	Course Type	PEC
Teaching Hours/Week (L: T: P: S)	3:0:0:0	Credits	03
Total Teaching Hours	40	CIE + SEE Marks	50+50

Teaching Department: Civil Engineering

Cours	se Objectives:
1.	To understand and know the necessity of valuation, types of value and determine
	depreciation by various methods.
2.	To know and decide suitability of different methods of valuing open urban lands.
3.	To know the different types of outgoings, understand standard rent determination.
4.	To describe the different methods of valuation of land with buildings and to Know
	valuation of hotel and cinema.
5.	To understand concepts of market values, easements and valuation of land acquisition.

UNIT-I

15 Hours

Purpose of valuation, forms of values, obsolescence, amortization, depreciation and its methods: straight line, constant percentage, declining balance, sinking fund and sum of years method. Problems on valuation using Year's Purchase, Capitalized value

Methods of valuation of open urban land, factors affecting intrinsic values of land, Comparative method, Abstractive method, belting method, hypothetical building scheme, developer's method, flat rate techniques. Problems on above methods.

UNIT-II

15 Hours

Outgoings: Municipal & Government Taxes, insurance, Loss of rent, collection charges, annual repairs & maintenance. Problems on outgoings. Rent: definition, types of rent, problems on standard rent of buildings. Cost of structure-BIS rules for measuring plinth area and cubical contents.

Valuation of land with buildings: Rental method, Valuation by reference to profit, Direct comparisons of capital value, Residual or developmental method, valuation based on cost or contractor's method. Leasehold properties and freehold Properties. Rights and Liabilities of Lessor & Lessee. Valuation of licensed premises. Problems on valuation of cinema and hotel

UNIT-III

10 Hours

Easements- self-imposed, legally created, Dominant and servient heritage- effect of easements on valuation. Market- Real Estate market and market value-fair market value, open market value-parameters affecting Investments- Bonds, debentures, capital gains, wealth Tax and Income Tax. Valuation on land acquisition

Cou	Course Outcomes: At the end of the course student will be able to				
1.	Make use of necessity of valuation, types of value and determine depreciation by suitable methods.				
2.	Choose and apply suitable methods to valuate open urban lands.				
3.	Determine standard rent of premises.				
4.	Summarize methods of valuation of land with buildings and to valuate hotel and cinema.				
5.	Identify market values, easements and valuate for land acquisitions.

REUSE & RECYCLE TECHNOLOGY					
Course Code:	22CCT222	Course Type	PEC		
Teaching Hours/Week (L:T:P: S)	3:0:0:0	Credits	03		
Total Teaching Hours	40	CIE + SEE Marks	50+50		
Tooching Donortmont: Civil Engineering					

Teaching Department: Civil Engineering

Cour	Course Objectives:		
1.	To learn the waste as a resource and govt. role in waste management.		
2.	To learn the system designing of waste resource.		
3.	To learn the energy recovery methods.		
4.	To study the analysis of waste.		
5.	To learn different categories of demolition waste.		
	· · · · · · · · ·		

UNIT-I

Waste as a Resource: Resource Economics, Disposable Materials, Classification of wastes Recycling Collection, Processing, Governmental Role in Waste Management, Potential for Reuse System Design: Design of Recycling Systems, Collection System, Process Train Design and Complexity, Product Design of Recycling, Conveyance, Transport Safety, Efficiency of Operation Systems.

UNIT-II

Energy Recovery: Combustion, Energy Losses, Energy Recovery Analysis Emission Control, Residue Control, In-Plant Operations, Refuse Derived Fuel

Waste Analysis: waste sampling, sampling mechanics, waste composition, waste properties, hazardous waste aspects

UNIT-III

10 Hours

15 Hours

15 Hours

Construction Demolition Wastes: Classifications, Reuse as fine aggregate, coarse aggregate, Properties of Construction Demolition Wastes, Properties of concrete products, Specifications, Standards, National Policy etc.

Cour	se Outcom	nes: At the end of the course stu	uden	t wil	be	able	to				
1.	Describe the govt. role in waste management and using waste as a resource.										
2.	Design a system for using waste resource.										
3.	Describe	the energy recovery methods.									
4.	Analyze	the waste for utilization in cons	truct	ion.							
5.	Segregat	te the different kinds of demolit	ion v	vaste	e .

BUILDING SERVICE & MAINTENANCE

Course Code:	22CCT223	Course Type	PCC
Teaching Hours/Week (L:T:P: S)	3:0:0:0	Credits	03
Total Teaching Hours	40	CIE + SEE Marks	50+50

Teaching Department: Civil Engineering

Cours	se Objectives:
1.	To understand the terms related to Fire and Life Safety.
2.	To know the classification of buildings based on occupancy, various fire alarm systems.
3.	To understand the installations of various services to the buildings such as lifts, Escalators,
	Fire extinguishers.
4.	To acquire knowledge about water supply services to buildings such as cold and hot water systems, Waste water systems, Solid waste disposal, Energy supply –Gas and Renewable
	sources.
5.	To understand the importance of building maintenance, Deterioration aspects,
	Investigation of defects in buildings, Maintenance problems and Route causes.

UNIT-I

15 Hours

Fire resistance, Classification of buildings based on occupancy, Means of escape, Fire alarm systems, Provisions of NBC.

Classification of building according to fire load, Engineering services in a building as a system, Lifts, Escalators, Fire Extinguishers - Portable Fire extinguishers, Automatic carbon dioxide fire extinguishing system, Halon or B T M system.

UNIT-II

15 Hours

Water supply services to buildings - Cold and Hot water systems, Waste water systems, Solid waste disposal, Energy supply - Gas and Renewable sources.

Building Maintenance: Importance of building maintenance, Principles of maintenance management and quality assurance, Agencies causing deterioration, Investigation of defects in buildings, Maintenance problems and Route causes.

UNIT-III

10 Hours

Materials for repair, Maintenance and protection. Preventive maintenance and Special precautions, Common techniques of building repair.

Cour	se Outcomes: At the end of the course student will be able to
1.	To describe the terms related to Fire and Life Safety.
2.	To explain the classification of buildings based on occupancy, various fire alarm systems.
3.	To describe how to provide essential installations of various services to the buildings including legal aspects.
4.	To execute installations of services to buildings such as cold and hot water systems, Waste water systems, Solid waste disposal, Energy supply – Gas and Renewable sources.
5.	To undertake repair and maintenance works of buildings in order to protect them from deterioration.
